Integrity Management Field Audit	Murphysboro	Jim Watts	Transmission	3	9/17/2013, 9/18/2013, 9/19/2013	Dallas Jett, Gary Bowers, Ray Emmenderfer, Rodney Pinnon, Tim Ashenfelter

**Statement of Activities**

On September 17-19, 2013, Staff observed Transmission Integrity Direct Assessment (ICDA) inspections performed by Ameren Illinois in areas of High Consequence Areas (HCA) to determine if internal corrosion is present at locations where the pipeline is at an angle where liquids could drop out of the gas stream and collect. A total of 6 locations were inspected with 2 being north of Murphysboro, Illinois, on a 12 inch transmission line; 1 north of Carbondale, Illinois, on a 10 inch transmission line; 1 in Marion, Illinois, on a 10 inch transmission line; and 2 outside of Pittsburg, Illinois, on a 4 inch transmission line. The inspections observed were performed using guided wave with no indications of internal or external corrosion being detected. The individuals with Structural Integrity Associates (SIA) performed the guided wave tests using calibrated equipment. The personnel with SIA had documentation indicating their current qualifications for conducting guided wave.

**ISSUE(S) FOUND:**

NO ISSUES FOUND.

**ISSUE(S) CORRECTED:**

NO ISSUES CORRECTED.

**NOTICE OF AMENDMENT(S) FOUND:**

NO NOAs FOUND.
